

OUR LEARNING GOAL

We will work with Miss Lethbridge this week to learn more about Earth's rotation to explore the changes such as night and day. We will use our own understanding of telling the time to help us to learn more about sundials and how the sun is used to tell the time. As a class, we will create our own sundial to measure the time. We will present our sundial to the other cluster classes on Friday the 26th of May.

Signed.....Mrs Forbes' Cluster Group.....
